36th Electric Vehicle Symposium & Exposition

evs36

BANULA – A novel DLT based approach for EV charging with high level of user comfort and role specific data transparency for all parties involved

Dr.-Ing. Daniel Stetter[1], Tobias Höpfer, Marc Schmid, Ines Sturz, Simon Falkenberger, Nadja Knoll

[1]Fraunhofer IAO, Germany. E-Mail: daniel.stetter@iao.fraunhofer.de

Our goal: combine customer oriented and grid compatible *charging* of EVs

Our approach: Establish a DLT based ecosystem for all players involved in a charging process

EDTA — Electric Drive Transportation Association
